Innovative Award Winner:

BROCK SERVICES, LLC INNOVATION NAME: RPB BLAST HOOD & AIRLINE SYSTEMS

The Brock Group and RPB partnered together over the last 2 years as their provider of industrial respirators for abrasive blasting. The key to partnering together was to prevent operators being able to connect their breathing airlines to a non-breathing air source that could result in serious injury or death. RPB designed and manufactured a solution called the RZ Fitting that is only able to connect to other RZ Fittings. This dramatically reduces the likely hood of someone connecting to a non-breathing air source, and also satisfies the OSHA requirement to ensure breathing air fittings are incompatible with other air supply sources.

THE RPB® BREATHING AIR SOLUTION

RPB® GX4 GAS MONITOR (WITH O₂, CO AND H₂S MONITORS) AND RADEX® AIRLINE FILTERS

- 1 Air enters via 2" compressed airline from compressor.
- 2 Filtered, safe air leaves via unique RPB® RZ coupler fitting through the RPB® Green Air Supply Hose to the RPB® NOVA 3.
- 3 All enters Nova 3™ from RPB® C40® Climate Control Device via Supplied Air Breathing Tube.

RPB® C40® CLIMATE CONTROL DEVICE

- 1 Air enters C40® via RPB® RZ coupler fitting.
- 2 Temperature controlled air leaves C40® to enter Nova 3™ via supplied Air Breathing Tube.

RPB® NOVA 3™

- 1 All enters Nova 3™ from RPB® C40® Climate Control Device via Supplied Air Breathing Tube.
