LIVE PROCESS SAFETY TRAINING

Live Process Safety Training at Valero St. Charles. This training is done in the field. Zachry is escorted to a job location. Operations locks out the equipment for training. Operations provides a "Draft" Work Permit, an Energy Isolation List, and the P&ID of the equipment. Zachry must produce a JSA based on the work scope provided. Operations conducts a "Joint Job Site Visit". Zachry must identify isolation points, bleed locations, and blind locations utilizing the EIL and P&ID. They must review the Work Permit and EIL for accuracy. Lastly, they must identify "traps" or hidden hazards within the equipment.
