OUR COMMITMENT TO SUSTAINABILITY

## **Safety Expectations!**

### **Did You Know...**

- Safety is absolutely the highest priority; regardless of work load, business changes, anything else – period.
  - The global safety standards are not optional and are expected to be fully applied in detail unless a variance is approved.
  - Every person in HES is expected to know the safety standards and how to apply them in their location operation.
  - Getting the details right – each and every time – with permits (maintenance work, vessel entry, hot work, electrical work, etc.) is a must.
  - Make sure our folks know and understand why it is absolutely critical to personally go to the work location immediately prior to when you issue a permit and that this cannot be delegated.
  - Take ownership and accountability for your own safety as well as your co-workers safety.
  - Going home injury free will make a lot of people smile with glee!
- *Don't put yourself in a position to be injured...***  
***Expect the unexpected!***
