OUR COMMITMENT TO SUSTAINABILITY

## ***Make Working Safely a Value!***

- ❖ Don't arrive at the work site with an attitude from road rage
- ❖ Don't let other priorities interfere with doing the work safely
- ❖ Don't take shortcuts or rush to "get the job done"
- ❖ Doing the work safely is an integral part of the job, not an extra or an add-on activity
- ❖ The job isn't done right if we
  - Get someone hurt
  - Take chances by short-cutting
  - Do not follow procedures or safe work practices for the job
- ❖ Encourage all the workers around you to challenge and intervene with others
  - Every worker on the site is an integral part of our safety program
  - If you observe something that is not safe, intervene and if they do not accept or agree with your intervention then be persistent and get help to correct the issue
