“Re-Evaluate the Job!”

Did you know when to stop & re-evaluate a job?

- Job scope changes!
- Plant or other conditions in your work area changed
- An additional hazard is recognized
- The job isn't going as easily or as well as planned
- I feel:
 - Tired, stressed, pressured
 - Distracted, frustrated
 - Discomfort, tightness, pain
- Something is:
 - Stuck or difficult to move
 - Too heavy to lift
 - Plugged
 - Leaking
 - Releasing an odor
- I need:
 - A procedure and/or a safe work practice
 - More help – coworkers, chief tech, leadership, etc.
 - A different tool or piece of equipment
 - To rest, cool off or get something to drink
